

The Maine Volunteer Lake Monitoring Program and its Maine Center for Invasive Aquatic Plants are very pleased to announce the availability of an important new publication:

Maine Field Guide to Invasive Aquatic Plants and their common native look-alikes

by Roberta Hill and Scott Williams

Newly updated and expanded, the field guide focuses on the eleven invasive aquatic plants currently listed by

Maine law as imminent threats to Maine waters.

Also featured are many native aquatic plants commonly confused with these eleven invasive species. Photographs, illustrations and narrative descriptions are presented for each of the featured species, along with a variety of cross-reference tools for easy comparison of similar species.

This 160-page reference--spiral bound and printed on tear-resistant waterproof paper--is built to hold up well to conditions in the field (including inclement weather and the occasional dunking).

Field Guide order form — cut and mail to VLMP, 24 Maple Hill Rd, Auburn, ME 04210

— or pay by **credit card** online by following the Field Guide link on the VLMP website: www.MaineVolunteerLakeMonitors.org
